

Architect Toasters

The Architect Toaster has a contemporary, industrial-inspired look, with clean, smooth curves and offers intuitive and reliable functionality. With innovative interchangeable panels, you can select and swap shades for your toaster and kettle according to your mood or latest trends. The Architect Toaster also features a bagel function, defrost setting and wide slots to accommodate chunky bread. Also available to buy is the sandwich cage for making delicious toasted sandwiches.

Perfect Toast Technology

Get perfectly consistent, golden brown toast every time with Dualit's patented Perfect Toast Technology. This ingenious feature measures key variables such as toaster temperature, room temperature and how many slices have been toasted, to determine exactly how long your bread needs in the toaster. Undoubtedly the ultimate in precision controlled toast!

Peek and Pop®

Patented Peek and Pop® makes burnt toast a thing of the past. Lift the bread with the ejector lever while toasting to check your toast, then drop it back down, all without interrupting the toast cycle giving you greater browning control.

Interchangeable panels

Interchangeable panels in a selection of colours and designs are available for both the Architect Kettle and Toasters, allowing you to transform your appliances whenever your personal style dictates. Moving house, updating your kitchen or just looking to add this season's colour, swap the panels on your Architect Toaster and Kettle in seconds.
